#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group IV in the reply filed on January 18, 2005 is acknowledged.
2. Claims 51-57 and 59-79 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group V, there being no allowable generic or linking claim.

### ***Drawings***

3. The drawings are objected to because several of the reference characters appear to point to the entire structure making it difficult to determine where the different components are located. Some examples include 8, 10A, 11, 30, 31, 32, and 44.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 39-50 and 58 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification fails to describe an input and output pressure application device, an input elastic member and an output elastic member, and a compound-

compressing device. The specification describes in paragraph 54 the pressure application device is made up of four components: the compound compressing device, the elastic device, an engaging device, and a driving source. Claim 1 requires 2 input and 2 output elastic members, and 2 compound compressing devices. There is no support in the specification for these limitations.
